Art Unit: 2839

#### **DETAILED ACTION**

# Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
   The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 2-3, 11 and 16-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
  - Claim 2 and 16 recite "coplanar pin" but does not provide any specifics as to whether the pins are in the same plane or the tips of the pins are in one plane, etc.
  - Claim 11 recites "substantial", which makes the claim indefinite.
  - Claim 18 recites "conductive line coplanar with the signal pins" but does not
    provide any specifics as to whether the pins and conductive line are in the same
    plane or the tips of the pins and the conductive line are in one plane, etc.

# Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claim 1-3 and 11-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Janko.

Application/Control Number: 09/990,877

Art Unit: 2839

Janko (Figures 1-7) shows a connector assembly having a body with a flange 24 having a cavity 20 and a plurality of pins 28 extending through holes 26 to contact leads (conductive lines) 14 of a semi conductor device on a chip carrier 12 received in the cavity. The tips of the pins are coplanar. A substantial part of the chip carrier is received in the cavity and the chip carrier is flush with a surface of the flange. The cavity is symmetrically at a center of the flange. Each of the conductive lines 14 has a bent portion which is coplanar with the tips of the pins. Although Janko does not specify a ground pin(s), it is inherent to have one or two ground pins to provide a path(s) for circuit return.

# Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 4-10 and 20-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Janko.

Janko show all the features of these claims as described in Paragraph 4 above except the signal path between the signal pin and the device to be 40, 75, 100, 200, 300, 400 or 500 mils and conductive line to be 50 or 100 mils. It would have been obvious to one having ordinary skill in the art at the time of the instant invention to arrange the device to a desired distance from the pins to obtain a desired signal path

Art Unit: 2839

and to make the conductive lines 50 or 100 mils long because this would require a mere

Page 4

arrangement or change in size which involve only routine skill in the art.

## Contact Information

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chandrika Prasad whose telephone number is (703) 308-0977.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Sircus, can be reached at (703) 308-3119. The fax number for this Group is (703) 872-9318 (general) and (703) 872-9319 for after-final.

Any inquiry of a general nature or relating to the status of this application or processing should be directed to the Group receptionist whose telephone number is (703) 308-1782.

Chandrika Prasad
